

Language and its modules used

Since the code for Subchannel Analysis was written in Python, and Python provides good libraries for numerical computations, graph plotting and user interface designing, we used Python. It is a great general-purpose high-level language.

Used to plot and embed curves in the GUI

Tkinter

Used to make the GUI (includes all GUI elements)

CustomTkinter

Modern version of Tkinter, used to make an enhanced GUI (cross compatible with Tkinter elements). (Poor documentation!)

pandas

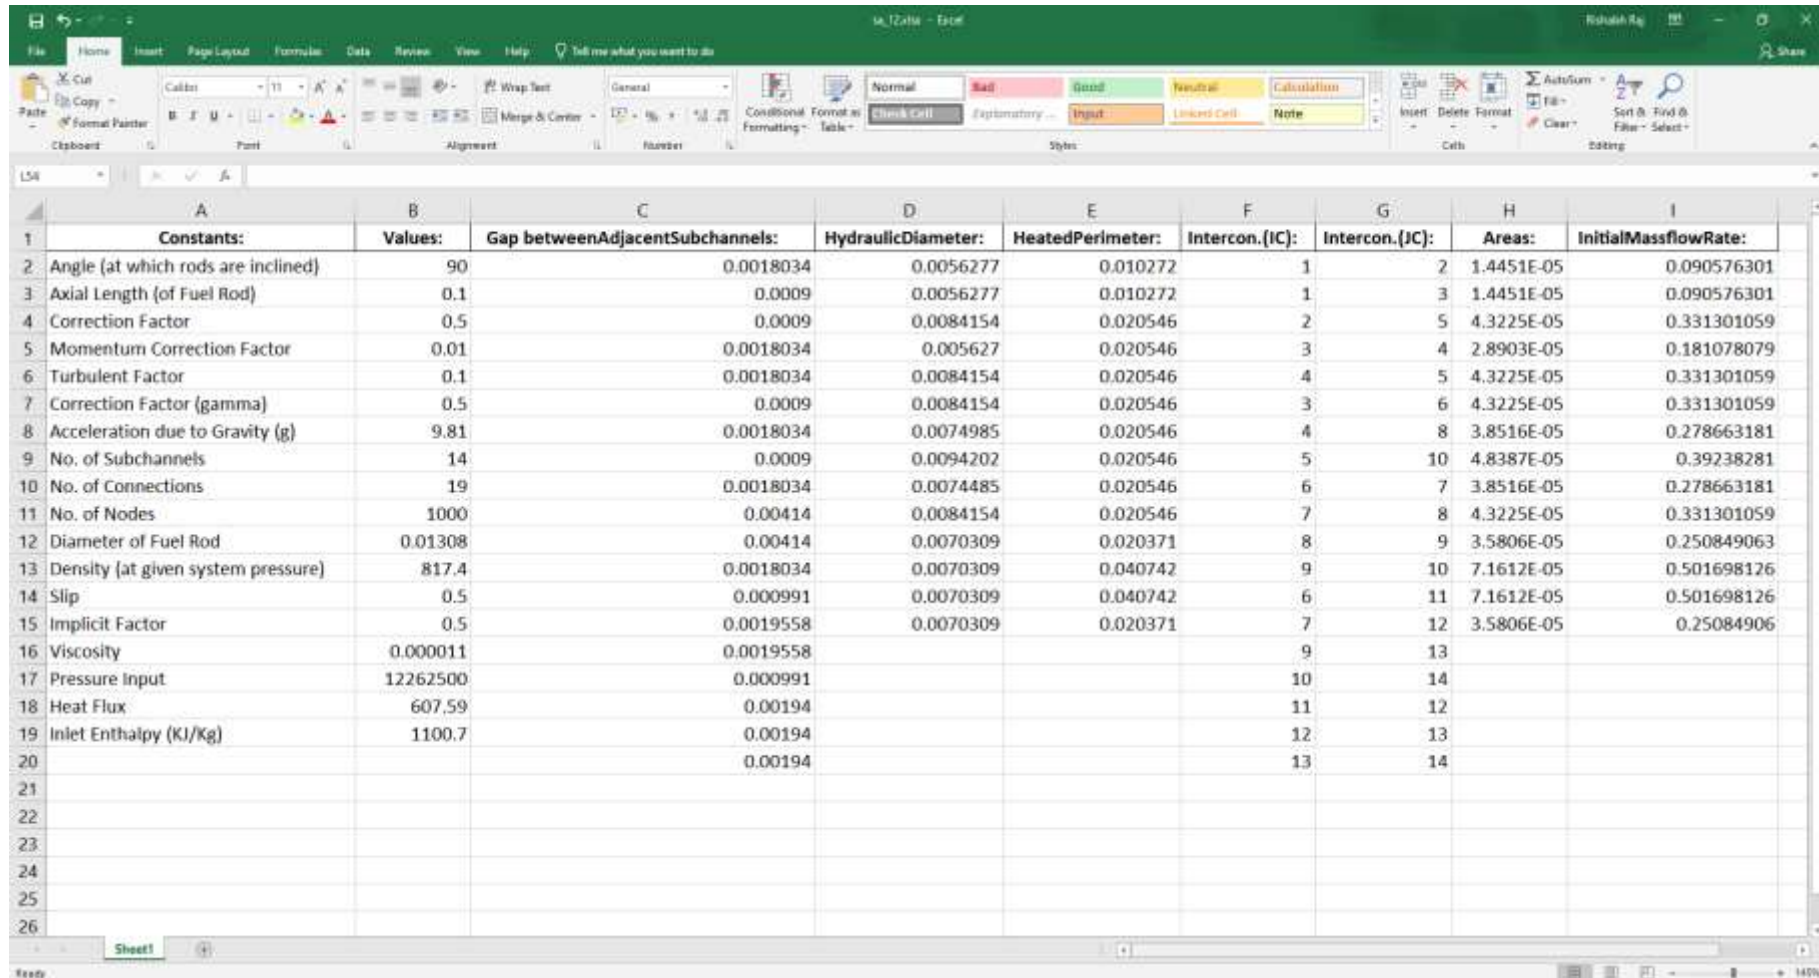

Used to Read and write the result files.

Opening Interface:

[illegible]

GUI

Template standardized data:
